

Data - March 2012

Data from Designing New York's Future

Selected charts and graphs from the Center for an Urban Future's March 2012 report on NYC's design schools. The report found that New York City graduates twice as many students in design and architecture as any other U.S. city, but the city's design schools are not only providing the talent pipeline for New York's creative industries—they have become critical catalysts for innovation, entrepreneurship and economic growth.
