Data - September 2011

Data from Fostering Careers

Selected charts and graphs from the Center for an Urban Future's major September 2011 study which revealed that an alarming share of young people who age out of New York City's foster care system are failing to obtain and hold on to jobs, and that part of the problem is that city government and foster care agencies are either not adequately focused on providing workforce preparation services to these youngsters or not equipped to do so.
